ABOUT HARRIS WOOLF ALMONDS

Rooted in Excellence. Grown for What's Next.

Harris Woolf Almonds is a vertically integrated, grower-owned processor of almonds, value-added almond products, and other nut butters. Think of us as your big friendly almond processor - striving to be at the forefront of almond innovation, grower relations, and supply chain transparency. HWA is built on 35 years of partnerships. Whether it be the cooperation of our founding family farms, the relationships we foster with our grower base, or the long-term projects we take on with the most recognized Food & Beverage companies, our success is rooted in the people we work with.

Whole ALMONDS

Our flagship ingredient, whole, natural almonds showcase unmatched flavor, texture, and quality, making them a prized choice for various industries and applications. Natural almonds enhance an extensive range of products, from snacks to sophisticated culinary creations, imparting their distinct, clean, nutty flavor.

Available in a variety of styles and produced using organic or conventional methods. The HWA team will work with you to source and provide your perfect whole almonds.

Suggested uses:

Snacking, Snack Mixes, Sports Nutrition Bars, Baked Goods, and More!

Inshell ALMONDS

Packed with natural flavor and a host of health benefits, Harris Woolf's inshell almonds offer a premium snacking experience that's nutritious and delicious. Renowned for freshness and quality, our almonds bring the rich taste of California to snack enthusiasts worldwide. With our expertise in sourcing and customizing, we ensure the perfect inshell almond solution for your business needs.

Suggested uses:

Snacking or Further Processing by Customer.

Other NUT BUTTERS

In addition to our signature almond butter, Harris Woolf now offers a full line of nut butters and pastes, including cashew, pistachio, pecan, macadamia, and hazelnut. These new varieties offer a rich array of flavors and textures, perfect for diverse applications across the food and beverage industry.

Harris Woolf is a peanut-free facility.

Suggested uses:

Non-Dairy Beverages, Sorbets and Gelatos, Baked Goods and Fillings, Nutrition or Protein Bars, and More!

SUSTAINABILITY

Sustainability isn't just a fad or marketing tool here; at HWA, it's integrated into everything we do. It starts with our growers and carries into our almond processing facilities. Ag-tech solutions, food safety, and social impact help us stay at the forefront of our increasingly fine-tuned industry. Growing and processing almonds is often perceived as an energy and resource-intensive effort, but HWA is committed to using less to produce more.

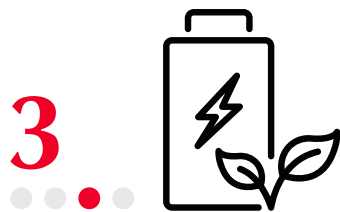

HWA 2025 Goals

1 Pollinator Health

Harris Woolf almond growers participate in certification programs that support pollinator health and habitat on agricultural lands. Our goal is to have 75% of our grower acreage enrolled in eligible pollinator health programs by 2025.

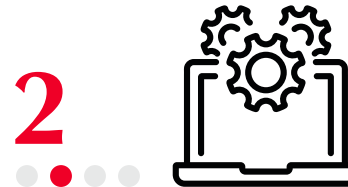

2024: 48.5% of grower acreage enrolled.

3 Energy Efficiency

With new solar projects, HWA has made great strides in transitioning to renewable energy. We've already far exceeded our 2025 goal of switching to 50% renewable energy use but want to maintain this progress before we consider this goal achieved.

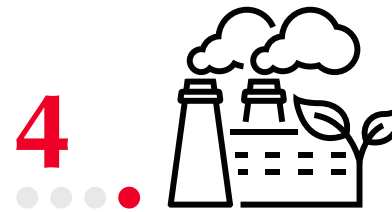

2024: 55% of energy consumption from renewable sources.

2 Supply Chain Engagement

The [California Almond Stewardship Platform](#) is a comprehensive assessment that advances the sustainable farming practices of California almond growers. We set a goal of having 75% of our grower acreage enrolled by 2025.

2024: 48.5% of grower acreage enrolled.

4 Carbon Footprint Reduction

Reducing our carbon footprint is a big piece of how Harris Woolf Almonds strives to be a better part of our local and world community. That's why we set a goal of reducing our Scope 1 and Scope 2 greenhouse gas (GHG) emissions 25% by 2025. As measured against our 2020 baseline assessment, we've already surpassed this! That doesn't mean our work is done, however. Like our Energy Efficiency goal, we need to maintain this progress through 2025.

2024: maintained 25% reduction in GHG emissions.

Financially Incentivizing SUSTAINABLE PRACTICES

We're serious about sustainable farming and that's why we financially incentivize our grower base to engage in sustainable and pollinator-friendly farming practices. Our Grower Incentive Program is primarily funded by our customers who are willing to pay a premium to almond growers who prioritize sustainable farming practices.

We encourage growers to enroll in the California Almond Stewardship Platform and pollinator health certifications like Pollinator Partnership. Depending on their level of participation in these programs, they earn an annual bonus.

In 2023 and 2024, HWA growers participating in our Grower Incentive Program received over \$4 million.

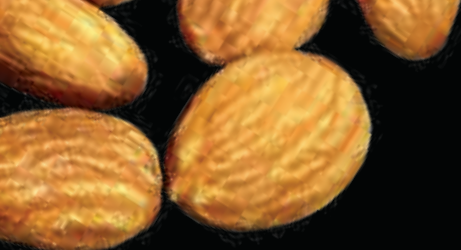

FOOD SAFETY

Food Safety is critical for consumers, the environment, and Harris Woolf Almonds. We enact comprehensive, globally recognized food safety plans throughout our facilities and continue to lead the way in maintaining a more traceable supply chain. HWA heavily invests in optical sorting and employee training. These intelligent preemptive measures lead to less waste, quality products, happier customers, and a safer world.

Our commitment to quality is backed by the following certifications:
